AutoPkg is awesome.

…But it could be easier!

Finding Recipes

elliot — bash — 110×27

```
autopkg search GoogleDrive

Name                                Repo/path
----                                ---------
GoogleDrive.download.recipe         autopkg/dankeller-recipes/GoogleDrive/
GoogleDrive.download.recipe
GoogleDrive.munki.recipe            autopkg/dankeller-recipes/GoogleDrive/
GoogleDrive.munki.recipe
GoogleDrive.download.recipe         autopkg/derak-recipes/Google/GoogleDrive.download.recipe
GoogleDrive.munki.recipe            autopkg/derak-recipes/Google/GoogleDrive.munki.recipe
```

Adding Repos

```
autopkg repo-add https://github.com/autopkg/dankeller-recipes.git

Attempting git clone...
Cloning into '/Users/elliot/Library/AutoPkg/RecipeRepos/com.github.autopkg.dankeller-
recipes'...
Checking connectivity... done

Adding /Users/elliot/Library/AutoPkg/RecipeRepos/com.github.autopkg.dankeller-recipes to
RECIPE_SEARCH_DIRS...
Updated search path:
  '.'
  '~/Library/AutoPkg/Recipes'
  '/Library/AutoPkg/Recipes'
  '/Users/elliot/Library/AutoPkg/RecipeRepos/com.github.autopkg.recipes'
  '/Users/elliot/Library/AutoPkg/RecipeRepos/com.github.autopkg.dankeller-recipes'
```

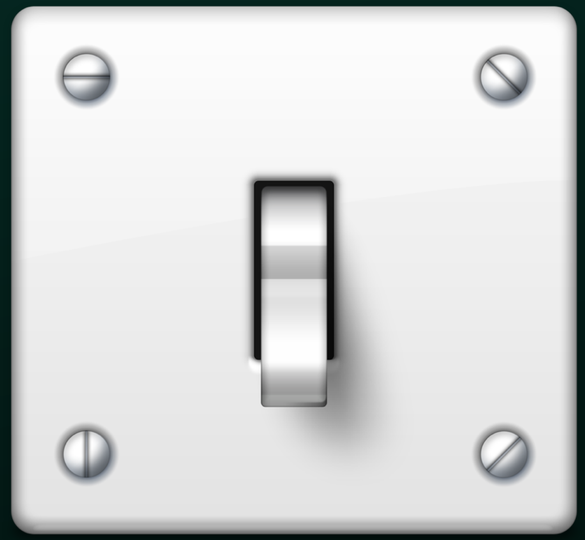
Downloading and Packaging

elliot — bash — 110×27

```
autopkg run GoogleDrive.download

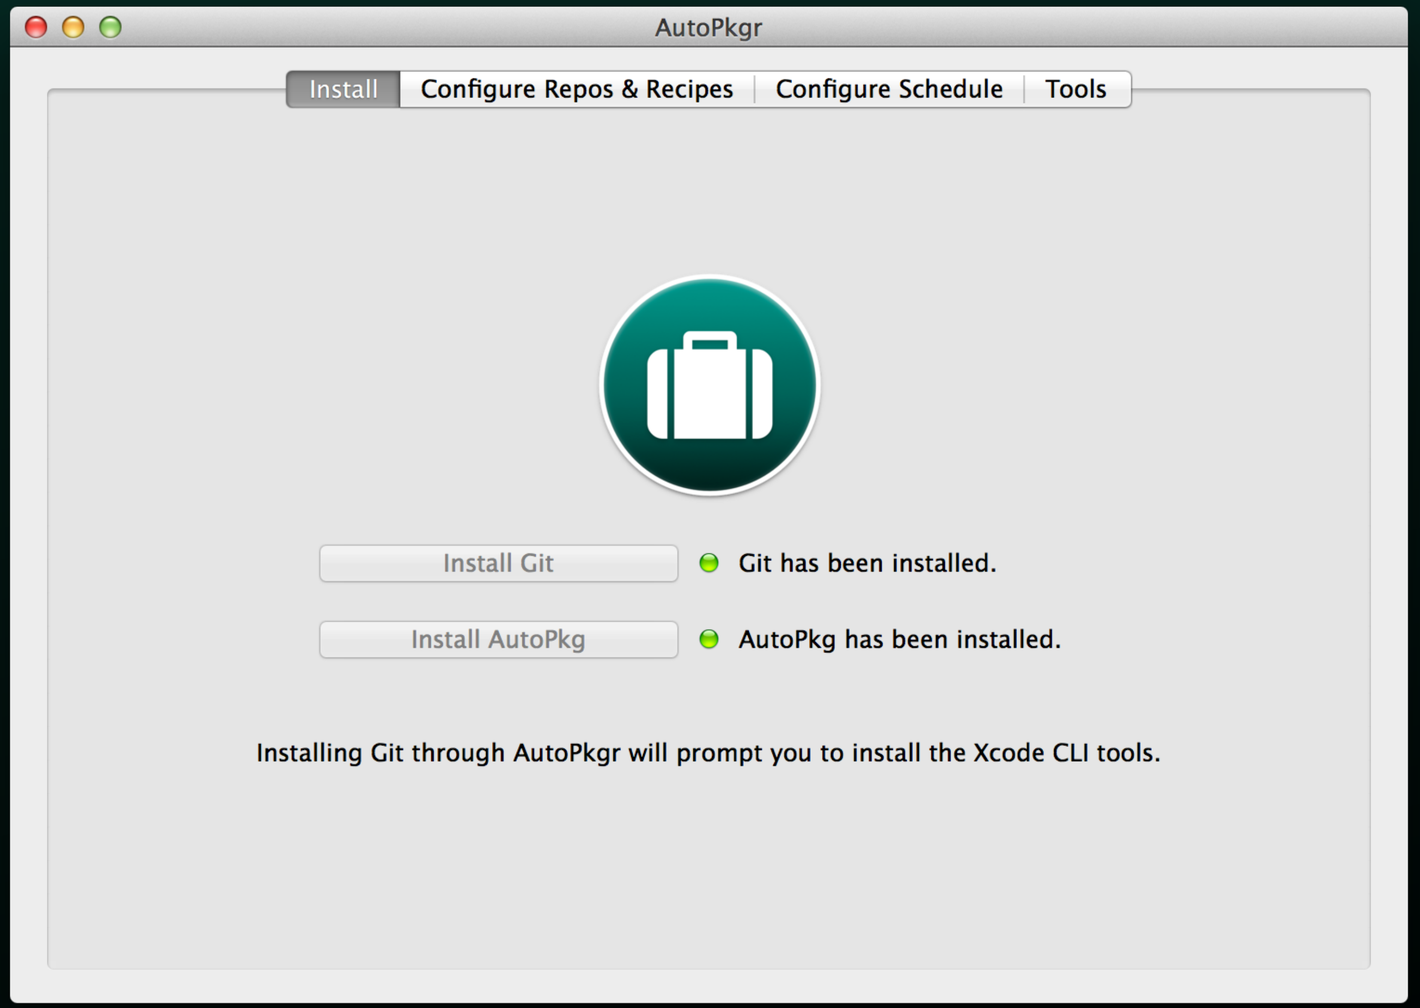
Processing GoogleDrive.download...

The following new items were downloaded:
    /Users/elliot/Library/AutoPkg/Cache/com.github.derak.download.GoogleDrive/downloads/
GoogleDrive.dmg
```

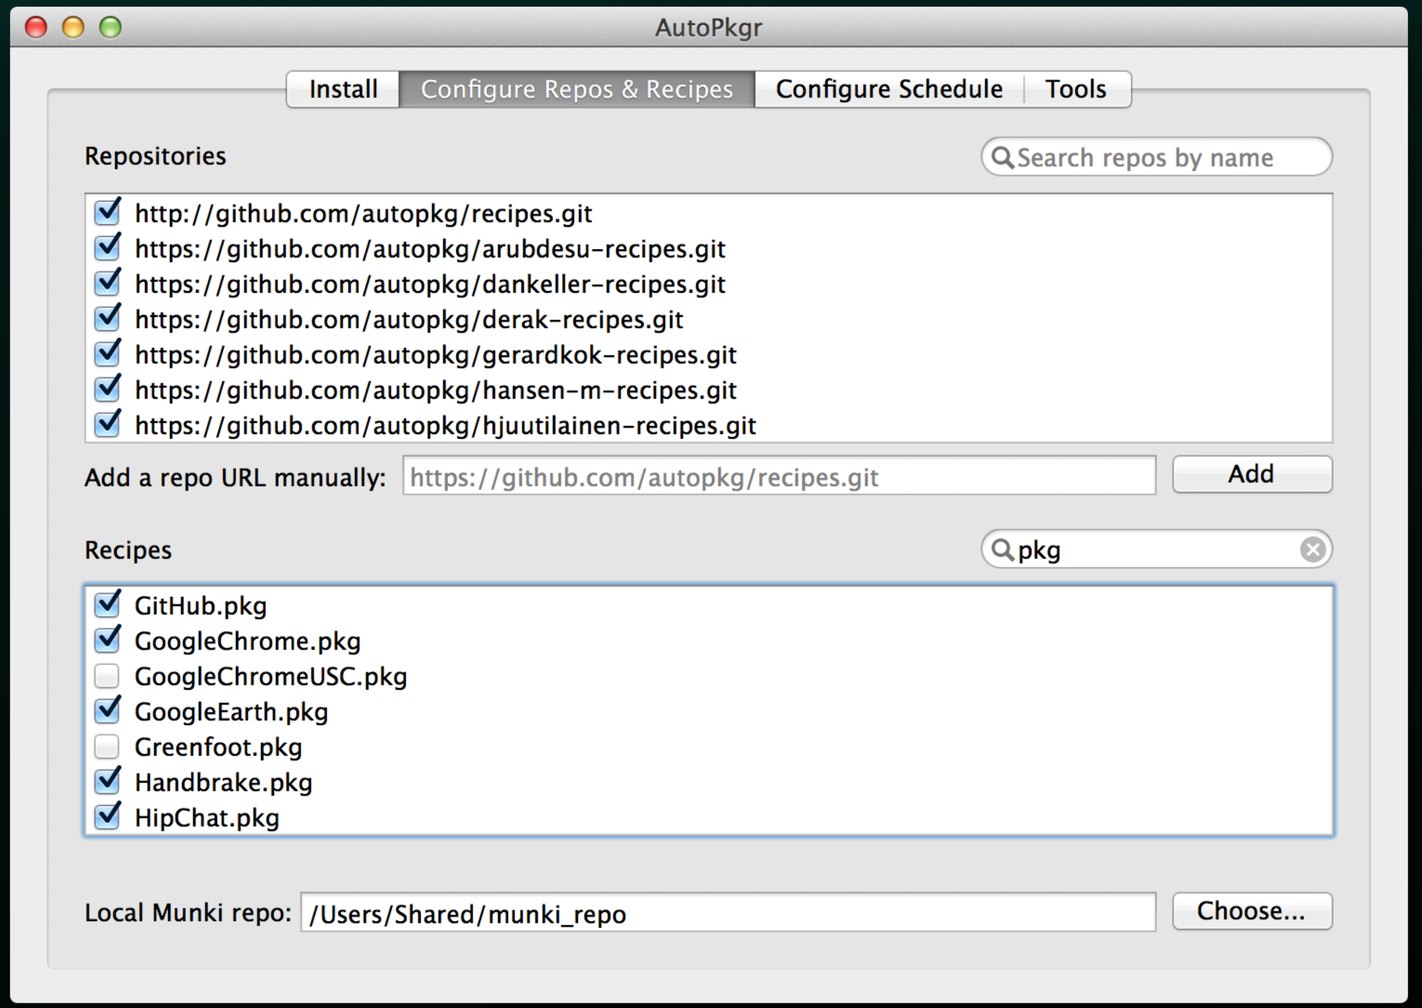


AutoPkgr

Simple installation.



Effortless repo/recipe management.



Automatic checks and notifications.
